

About Us

NativesWest Nursery (NWN) is a family owned and operated business nestled in the Clearwater River area of central

Idaho . NWN specializes in landscape quality trees, shrubs, grasses and wetland plants native to the Pacific Northwest and Intermountain Region.

Here at NativesWest we take pride in the fact that we use only organic fertilizers and we don't spray chemicals to treat our plants. We use only natural methods of growing and propagation, staying true to our vision of a greener 21st century, and further protecting the health of our customers and the environment.

NWN carries high quality container grown native and ornamental trees (non-native species), shrubs, grasses, wetland plants and will custom grow most species including forbs (herbaceous flowering plants). We also stock carefully selected northwest varieties of fruit trees and berry plants.

Bee pollinating blueberry florets (below).
